

# Input Module - APS-53

AutoVoice BR-200

Product datasheet

## Features

- External remote controls: of up to 4 different functions
- Remote controls activation: external voltage between the corresponding pins on the pluggable connector block
- 4 internal switches (S 5,7,9,11) for the activations of the conditions (3 ON= condition active if voltage existent, 4 ON= condition active if voltage not existent)
- 4 internal switches (S 6, 8, 10, 12) for the (selectable) activation of the system by the remote controls 1 to 4 (1 ON= system turned on if voltage existent, 2 ON= system turned on if voltage not existent)

## Technical specifications

Control voltage: (Between a and b) (Option)	24 VDC (min. 19 V, max.43 V) 24 VDC (min. 14 V, max.30 V)
Power output (e.g. for pilot lamps)	+ 17 V (fused by 170 mA)

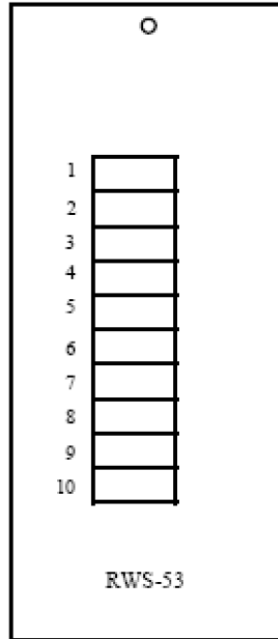

Part number	Description
116-BRG-APS53-SEC-24-V	Input Module, 4 inputs
