

# 116-900950 Nozzle B1

Fire Suppression  
Product datasheet

## Features

- Low pressure water mist 10,5 – 16 Bar
- In-line filter fitted
- For bilge protection with 1% AFFF for increased safety.
- Simple and reliable construction
- Low weight
- Fresh and sea water applications
- Tested in accordance with IMO MSC Circ. 1165, total flooding water mist.
- Type approved by all the major classification societies for both total flooding and local protection.
- Wheel mark certified in accordance with the MED Directive

## Applications

The B1 Nozzle is a low-pressure water mist nozzle designed for a large variety of applications and hazards.

B1 Nozzles are suitable for installation in dry pipe systems.

The Nozzles are designed to produce a fine mist of small water droplets. This makes the nozzles suitable for fire protection of bilge area.

Technical specifications	
Weight	0,04 Kg
K-Value	2,8 (Metric)
Spray angle	120 dg
Material nozzle	Naval brass
Material filter	Stainless steel
Dimension	Ref. technical data sheet
Finish	NiSn plating
Thread	3/8" BSPT
Working pressure	10,5 – 16 Bar
