

GENERAL PUSH BUTTON BF-9

Fire detection systems Product Datasheet

Features

- Latching pushbutton
- Suitable for fire and security and other special applications
- Variety of colours and markings
- Easily mounted
- Optional cover

Description / Application

The General Push Button BF-9 provides you with the most straight-forward switching product solution for fire, security and other specialist applications.

The product comprises a main housing and protective plate. The switching device is fitted to the plate, which simply snaps into the main housing and is permanently located into place by fixing screws.

The push button comes with the following configuration:

- Latching – a push/push action; the contacts transfer when the button is pressed and stay transferred until the button is pressed again.
- Terminated – 120mm long 16/0.2mm² cable is soldered to the six terminals of the switching device. Shrouded 100mm 1 amp 32/0.2mm² cable is soldered to the 3 terminals.

Part number	Description	Mounting
116-BF-9	GENERAL ALARM PUSH BUTTOM Minature, Latching, terminated	Surface
116-4860-012.0100	Cover for pushbutton BF-9
