

# AutroXT EXTINGUISHANT CONTROL PANEL BA-51/1

## Reliable fire protection

AutroXT extinguishant control panel BA-51/1 is a standard-compliant panel that – when used together with Autronica’s interactive fire detection systems AutoSafe 4 or Autoprime – enables automatic extinguishant release in critical areas where a fire would be catastrophic, like power plants, computer rooms, switchboard rooms or engine rooms.

The extinguishant control panel has two fully monitored inputs for connection to fire detection control equipment or addressable control modules to provide an EN 12094-1 compliant extinguishant control system.

Its many programmable features and extensive range of inputs and outputs make the BA-51/1 suitable for all extinguishing applications where a fully featured control device is required.

## SCHEMATIC EXAMPLE

The AutoXT extinguishant control panel BA-51/1 is connected to the AutoSafe 4 / Autroprime fire alarm control panel via two I/O units, each panel covering one zone.

### Ease of installation

The simple construction of BA-51/1 utilises removable bridge plates for mounting all electronic assemblies. These bridge plates bring the terminals to the front of the enclosure providing easy access to all wiring terminals.

The outer door may be removed to further improve access by withdrawing the easily accessible hinge pins. This ensures clear access for wiring and protection of the electronic assemblies during installation.

Multiple knockouts in the top, bottom and back and sides of the enclosures provide ample options for cable entries.

### Features

- ✓ Approved to EN 12094-1
- ✓ Dual extinguishant outputs
- ✓ First and second stage sounder outputs
- ✓ First and second stage relay contacts
- ✓ Main reserve facility
- ✓ Discharge countdown time indicator
