

INPUT MODULE - APS-16.2

AutroVoice BR-200
Product Datasheet

Features

- APS-16.2 Input Module for microprocessor controlled microphone command console and BR-210 operator panel
- Fully programmable from PC (via APS-990 processor module for programming priorities etc.)
- Up to 30 digital microphone consoles and operator panels, parallel on the same APS-16.2 Input Module
- Bi-directional data communication via bus cable
- RWS-16 connection module accessory with the 6-phase XLR socket or the 5 pin terminal board
- Volume control on the front
- 4 channel technology and I²C BUS-logic

Product Name	Part number	Description
APS-16.2	116-BRG-APS16.2	Input module for microprocessor controlled microphone consoles and operator panels

Technical specifications	
Input	Electronically symmetrical
Input sensitivity	0 dBm (775 mV)
Input impedance	600 Ohm
Power supply	17 V for microphone consoles
Connection	APS-3xx microphone console and operator panel BR-210
Console priority/bypass	In accordance with APS-990 programming
